BAY PRO SERIES

EXCEL
BOATS

MADE IN THE USA

The Bay Pro's Excelleration™ Pad Hull is engineered to provide the highest degree of performance, stability, handling and seaworthiness. Meticulous detail differentiates the Excel Bay Pro from others. Extra bracing, .160 GA aluminum and excessive reinforcement establishes the Excel Bay Pro as the toughest in the industry.

Experience the smooth operation, handling and legendary trustworthiness of Yamaha and an Excel Bay Pro

Capt. Doug Wynn - ★★★★★
 I've owned and fished out of my Excel Bay Pro 203 for several years. It is by far the finest platform made for my style of fishing. It is a safe, dry, and fast boat. My clients love the storage, room, and ride. Excel puts a lot of ideas from fishermen into the design of their boats.

LENGTH	BOTTOM	BEAM	SIDE HEIGHT	TRANSOM	MAX HP	CAPACITY	ALUMINUM	WEIGHT

Stewart Robinson - ★★★★★★
 Picked up our Bay Pro 220 about two weeks ago. Rarely does a product exceed my expectations but this boat has. It has the quickest hole shot of any boat I have owned. It has already been exceptional for bass, crappie, big water & dragging kids on skis & tubes. I'm proud to be affiliated with Excel Boats!

LENGTH	BOTTOM	BEAM	SIDE HEIGHT	TRANSOM	MAX HP	CAPACITY	ALUMINUM	WEIGHT
22' 0"	68"	94"	25"	21"	200	8/1157	0.160"	1718 lbs.
